28. A method for geographically tracing a traffic event utilizing a personal firewall, comprising:
monitoring traffic events between a local computer and a remote computer over a network
utilizing a personal firewall;
displaying the traffic events in an event log utilizing the personal firewall, wherein the traffic
events are organized based on a time associated therewith;
tracing at least one of the traffic events utilizing the personal firewall; and
displaying a geographical map of the trace utilizing the personal firewall,
wherein the at least one traffic event is traced in response to a user request.

29. A computer program product for geographically tracing a traffic event utilizing a personal
firewall, comprising:
computer code for monitoring traffic events between a local computer and a remote computer
over a network utilizing a personal firewall;
computer code for displaying the traffic events in an event log utilizing the personal firewall,
wherein the traffic events are organized based on a time associated therewith;
computer code for tracing at least one of the traffic events utilizing the personal firewall; and
computer code for displaying a geographical map of the trace utilizing the personal firewall,
wherein the at least one traffic event is traced in response to a user request.
